PROFESSIONAL SUMMARY

DevOps and Cloud Engineer with hands-on experience designing, automating, and deploying cloud infrastructure using AWS, CI/CD pipelines, Docker, Kubernetes, and Infrastructure as a Code. Proven ability to improve deployment reliability, system scalability, and developer productivity through automation and cloud-native best practices.

TECHNICAL SKILLS

AWS (EC2, S3, IAM, CloudWatch, VPC), Linux, Nginx, Git, GitHub Actions, Jenkins, Terraform, Ansible, Docker, Kubernetes, CI/CD Pipelines, Shell Scripting, JavaScript, TypeScript, Node.js, React, Next.js, Maven, Gradle, npm, Yarn

EXPERIENCE

DevOps Engineer

Movva – Remote, United States

· Full-time | Jan 2025 – Present

- Designed and operated **end-to-end CI/CD pipelines** using GitHub Actions and Jenkins to automate build, test, containerization, and deployment workflows on AWS.
- Provisioned and managed AWS infrastructure (**EC2, S3, IAM, VPC**) using **Terraform**, enabling repeatable and version-controlled infrastructure deployments.
- Implemented **configuration management and server automation with Ansible**, reducing configuration drift across environments.
- Built and deployed **Dockerized application architectures**, ensuring environment parity across development, staging, and production systems.
- Supported production infrastructure reliability through monitoring, troubleshooting, and deployment optimization.

Software Engineer

myimoapp – Remote

· Contract | Feb 2024 – Dec 2024

- Developed and maintained responsive frontend features and user interfaces for web applications using modern JavaScript frameworks.
- Collaborated with backend engineers and designers to implement scalable, user-focused product features.
- Improved application usability, responsiveness, and overall user experience across different devices and screen sizes.
- Diagnosed and resolved frontend bugs, UI inconsistencies, and performance issues to improve application stability

Software Developer

AyaHq- Delaware, US (remote)

· Contract, Dec 2022 - October 2024

- Redesigned the company's main web application, resulting in a 250% increase in leads.
- Achieved an ROI of 350% through improved web design and user experience.
- Contributed to the platform's growth, which now supports **7 communities**, has hosted **13+ hackathons**, onboarded **1,469 builders**, and hosted **150+ projects** in the Web3 and blockchain space.

PROJECTS

Automating CI/CD & Data Persistence for a Django Application

Technologies: Django, Docker, GitHub Actions, AWS EC2, SQLite

- Implemented a **CI/CD pipeline** using **GitHub Actions** to automate Docker image build, push, and deployment to **AWS EC2**.
- Containerized a Django backend with **Docker**, ensuring consistent environments across local and production systems.
- Configured **persistent storage** for SQLite using Docker volume mounts to prevent data loss during container redeployments.
- Automated server deployments via shell scripts, eliminating manual SSH-based release processes.
- Established a reliable, reproducible deployment workflow designed for future scalability and infrastructure evolution.

Automating CI/CD & Durable File Storage for a Web Application

Technologies: Jenkins, GitHub, AWS EC2, AWS S3, Node.js, CI/CD

- Designed and implemented an automated **CI/CD pipeline using Jenkins** to deploy backend and frontend services from GitHub to **AWS EC2**.
- Eliminated manual server provisioning and SSH-based deployments by automating code delivery, dependency installation, and application restarts.
- Migrated file uploads from local instance storage to **AWS S3**, ensuring durable, shared access across backend instances.
- Implemented secure **environment variable injection** via Jenkins credentials for AWS and application configuration.
- Diagnosed and resolved runtime configuration issues related to **process management and environment visibility**.
- Established a stable deployment baseline enabling horizontal scaling and future process orchestration improvements.

CERTIFICATION

AWS Solutions Architect – Associate

AWS Cloud Practitioner

AWS AI Practitioner

DevOps Engineering Certification

Introduction to Kubernetes (LFS158)

Introduction to Linux (

Diploma – Software Development

Bachelor of Technology – Chemistry
